

# INSTANT HEDGING

## INSTANT HEDGING

---

These perfectly finished hedging units are proving extremely useful and are in more demand than ever before. The plants are always very strong and healthy with an excellent root system which is undercut regularly ensuring virtually zero loss if planted, maintained and irrigated properly. These units are all 100cm long by 40cm wide and come in a selection of heights.

We also offer another form of instant hedging and these are field grown rootballed plants available from late October through to April. These plants are clipped, square sided columns and can be up to 100cm wide and 400cm tall or more depending on your specification. Planted abut one another they form a hedge that could have been growing there for 30 years! These are truly your best option should you be wanting 'instant age'. Of course, these superb plants also make stunning features in their own right planted as single specimens, groups or lining a drive.

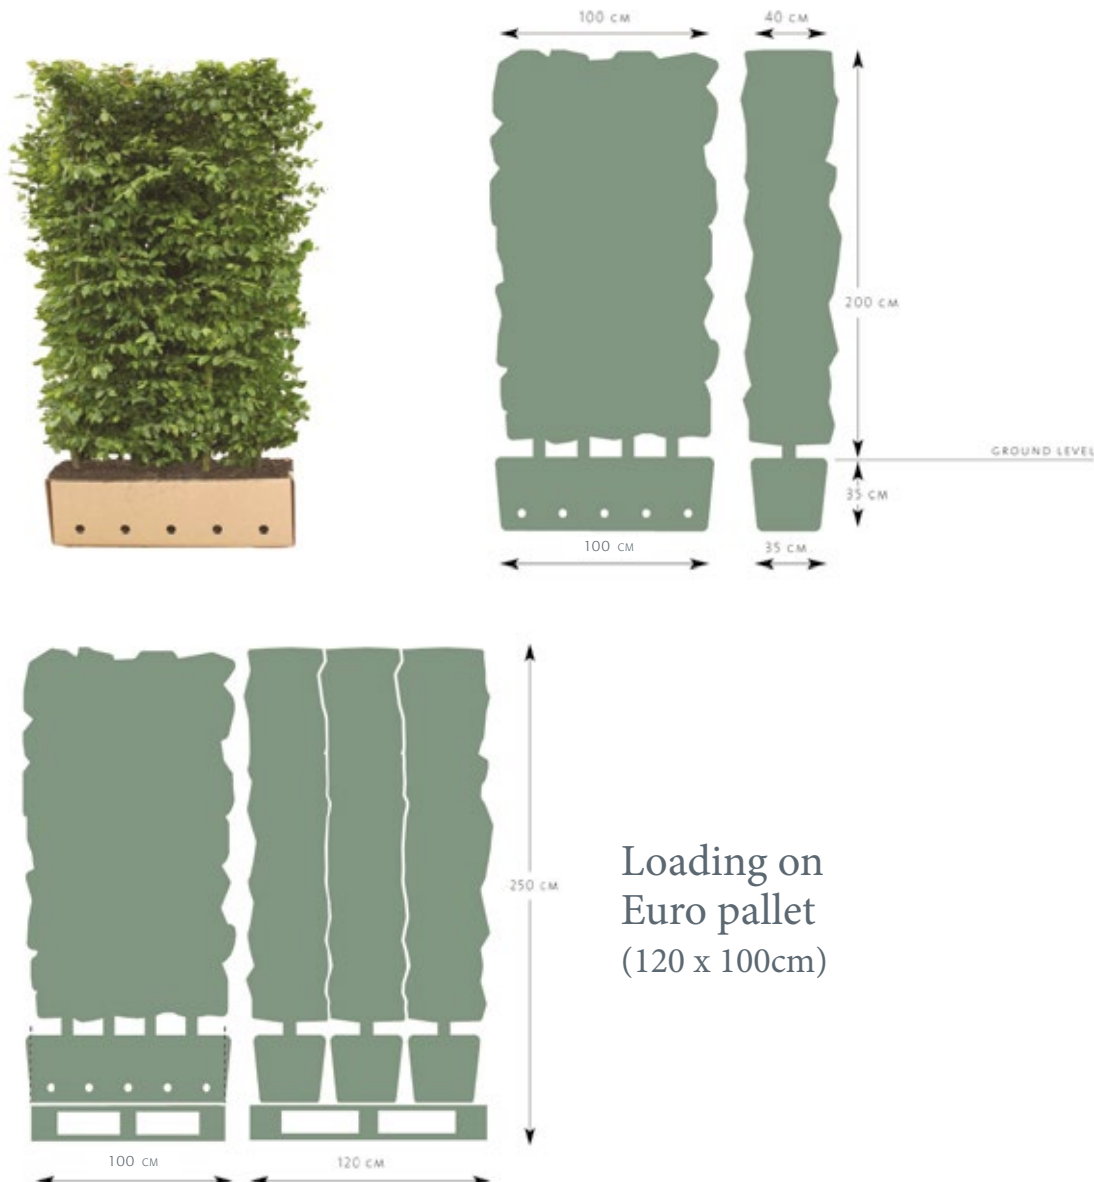

## Installation & Dimensions

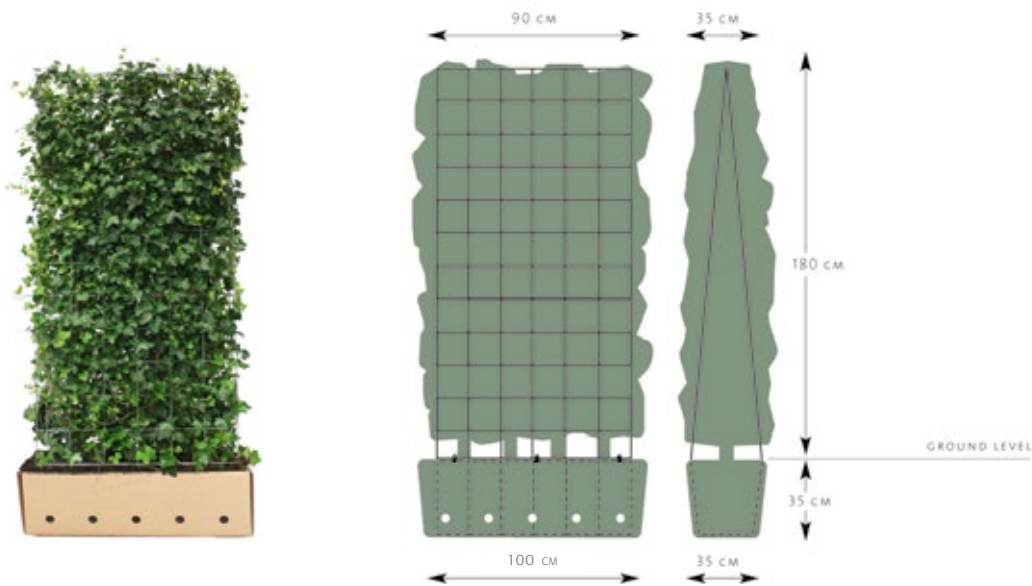

The units are very easy to install and come in biodegradable cardboard containers. There is no need to take the plants out of the containers, simply drop them straight into the trench and back-fill as normal. If you are planting in spring or summer it would be advisable to run a simple irrigation system along the hedge line. Every order comes with free irrigation pipe.

- **The working length per unit is 100cm - remember when ordering.**
- **Dig trench to a minimum of 35cm wide and 35cm deep.**
- **Ensure the top of the biodegradable cardboard box is just below the soil level.**

### Hedging Units (without frame)

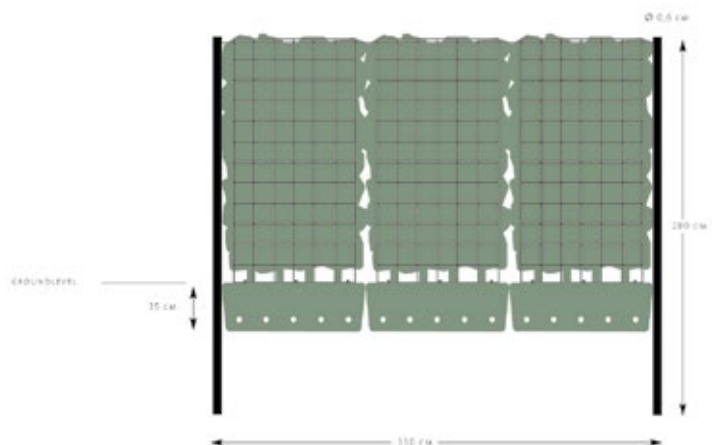

## Hedging Units (climbing plants with frame)

### Installation of Hedging Units (Climbing plants with frame)

When installing climbing plants we recommend one support stake or pole every three units with a straining wire running just below the top of the frame. Normal hedging units (i.e. Fagus) would not need to be supported in this way.

**Acer campestre** Available heights: 180 | 200cm

**Carpinus betulus** Available heights: 80 | 120 | 150 | 200cm

**Cornus mas** Available heights: 200cm

**Elaeagnus ebbingei** Available heights: 160 | 180cm

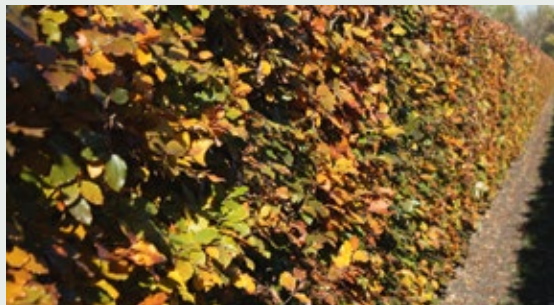

**Fagus sylvatica** Available heights: 80 | 120 | 200cm

**Fagus sylvatica Atropunicea** Available heights: 200cm

**Hedera Hibernica** Available heights: 180cm

**Hydrangea anomale petiolaris** Available heights: 180cm

**Ilex meserveae Blue Maid** Available heights: 180 | 200cm

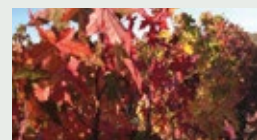

**Ilex meserveae Blue Prince** Available heights: 180 | 200cm

**Ligustrum ovalifolium** Available heights: 200cm

**Liquidambar styraciflua** Available heights: 200cm

**Metasequoia glyptostroboides** Available heights: 200cm

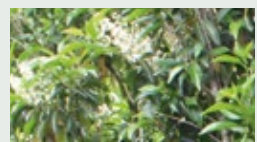

**Picea abies** Available heights: 180 | 200cm

**Prunus laurocerasus Rotundifolia** Available heights: 200cm
