

OLD FRUIT  
TREES

## OLD FRUIT TREES

---

Pruned for decades, these old fruit trees will instantly lend an air of maturity and character to the garden in a way that almost nothing else can. They look perfect in the traditional country garden but will indeed be a splendid addition to any garden that needs a fruit tree.

Taken from orchards, the trees are mostly low branching making fruit picking easy. Please ask for more details.

*There is currently no VAT chargeable on fruit trees.*

These trees are like good old friends, stable, reliable but a bit quirky with bags of character and a fruity sense of humour! They'll add a certain aura of bygone days to a garden and will bring with them their own evidence of many years of skilled husbandry.

Two forms are available – low branching standard trees and espaliers.

The standard trees are available as Plums, Pears and Apples and sizes range from 30/35cm to 60/70cm girth (circumference). Normally the trees will have a clear trunk of about 60/70cm tall, a total height 220/250cm and a span of 200cm. These sizes are approximate and may vary depending on the type of fruit tree and girth size.

Espaliers are only available as Pear Conference. These are really spectacular trees and, planted against a wall will give the impression that they were placed there by our forebears, whilst planted in rows as a free standing garden partition they will create an intriguing garden room.

Later in the winter the trees may be supplied as wire rootballs but mostly they are potted which means they're available all year round. You may find them surprisingly cost effective - please contact us for more details.

**Customer comment:**

'Kingsdown were so easy to deal with – quick to respond, attentive and their prices really competitive... the Espaliered Pears arrived in perfect condition despite their stately years and instantly looked at home leaning against the old barn, as though it had always been so.'
