

A photograph of a garden featuring a row of conical topiary bushes. The bushes are dark green and have a dense, textured appearance. They are arranged in a line on a light green lawn. In the background, there is a tall, dark hedge and a line of bare trees under a clear sky. The word "TOPIARY" is written in a large, serif font at the bottom of the image.

# TOPIARY

## TOPIARY

---

**T**opriary has been used in the gardens of Europe since Roman times. It survived a popularity decline in the 1700's and experienced a dramatic revival in the mid 19th century, from which it has not regressed. In fact, Topiary today is more popular than ever and found in a huge number of British gardens from the smallest spheres to stately works of art that are often decades in the making.

At Kingsdown we have had the pleasure of being involved in supplying topiary for many fascinating projects and in the following pages you will get a glimpse of what is available to stir your imagination.

Along with mature hedging, large unusual topiary and feature plants are really what we are best at. We source these shapes from specialist growers all over Europe and availability and quality is checked before we quote for each item. There are rarely two enquiries alike for such diverse plants so each query is assessed and quoted for on an individual basis.
