

BAREROOT

FRUIT TREES

BAREROOT FRUIT TREES

Always welcome in the garden, a wide range of fruit trees is available from Kingsdown, grown in a variety of traditional ways.

A selection of more mature fruit trees is also available as half standards and full standards. These can be supplied up to 25/30cm girth. Our sales team will be pleased to provide you with prices and availability.

Pollination: In urban gardens pollination of fruit trees is not usually a problem due to the proximity of so many other varieties. However, the varieties that we are showing here have been chosen so that they are all in the same groups ensuring successful pollination.

Soft Fruit: Most soft fruit bushes are available. We can supply large quantities if required. Please enquire for prices.

Apples

Mostly grown on MM106 Rootstock.
All varieties shown here are of the same Pollination group.
