

A photograph of a row of tall, conical topiary bushes in autumn. The bushes are covered in brown and orange leaves, standing in a line on a green lawn. In the background, a house with a dark roof and blue dormers is visible, along with a line of bare trees on a hill. The word "TOPIARY" is written in a large, serif font at the bottom of the image.

TOPIARY

TOPIARY

T*op*iary has been used in the gardens of Europe since Roman times. It survived a popularity decline in the 1700s and experienced a dramatic revival in the mid 19th century, from which it has not regressed. In fact, Topiary today is more popular than ever and found in a huge number of British gardens from the smallest spheres to stately works of art that are often decades in the making.

At Kingsdown we have had the pleasure of being involved in supplying topiary for many fascinating projects and in the following pages you will get a glimpse of what is available to stir your imagination.

Along with mature hedging, large unusual topiary and feature plants are really what we are best at. We source these shapes from specialist growers all over Europe and availability and quality is checked before we quote for each item. There are rarely two enquiries alike for such diverse plants so each query is assessed and quoted for on an individual basis.
